

iPad Learning Experience

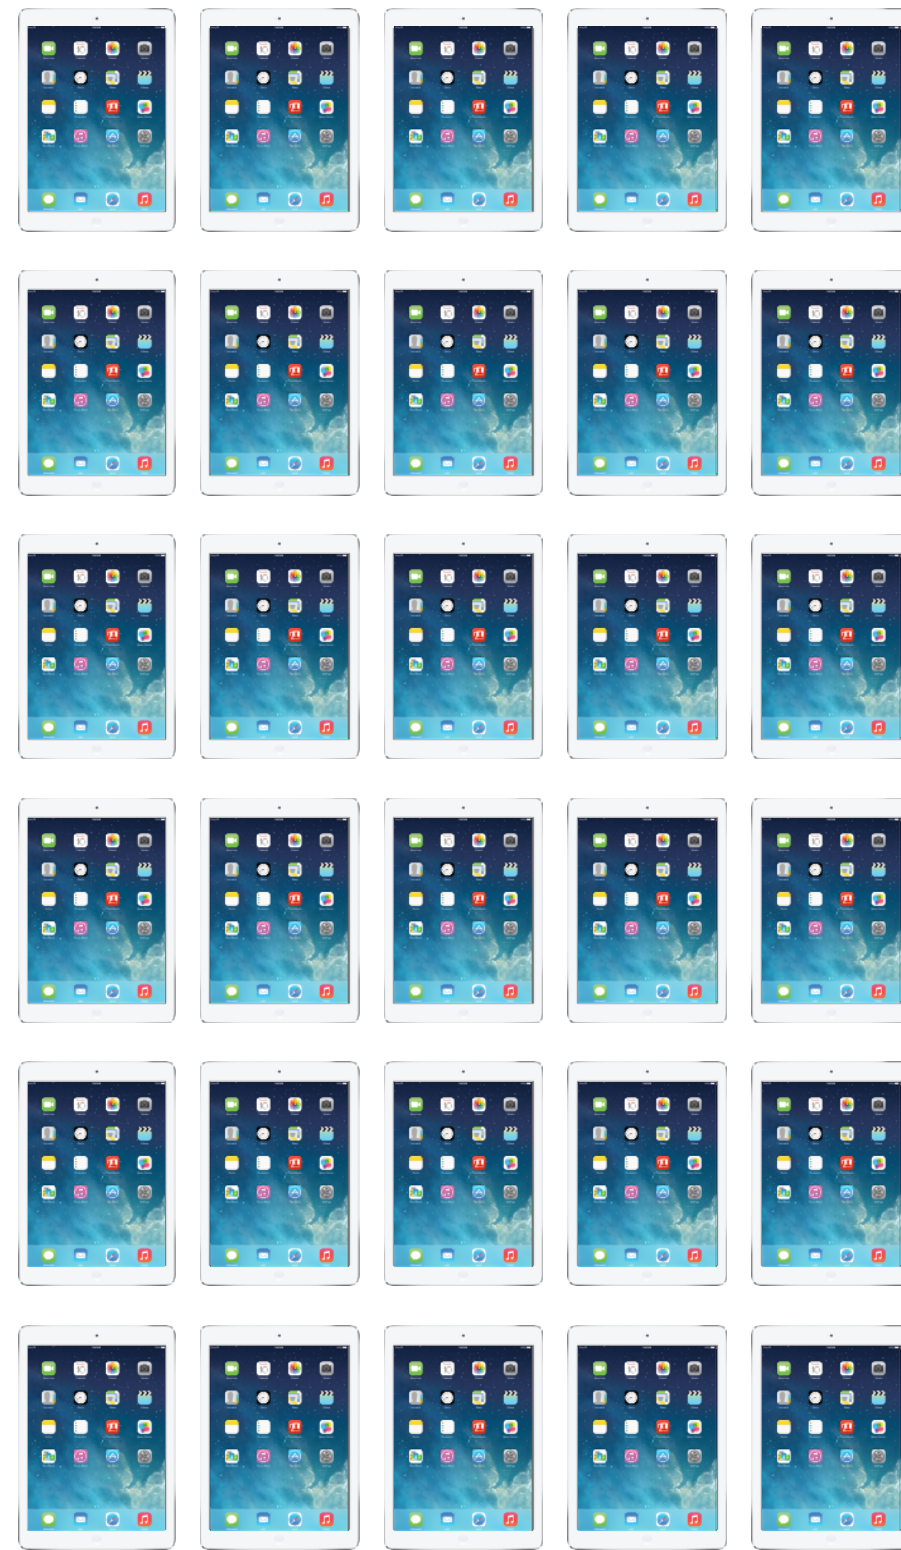

Overview

The iPad Learning Experience (ILE) is
designed to introduce school
communities to 1:1 learning with iPad.

The ILE provides the opportunity for:

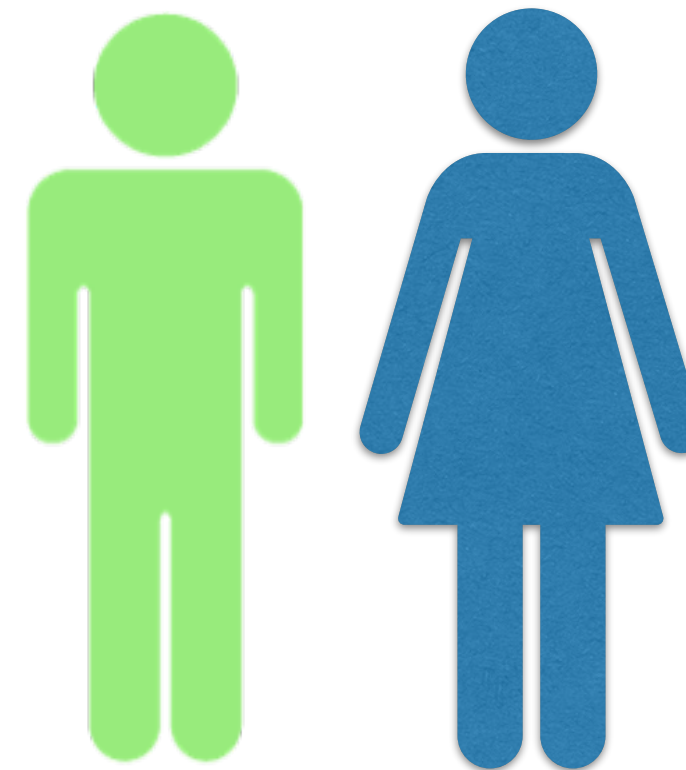

- deep engagement and dialogue across a school community on the benefits of 1:1 learning.
- data gathering to inform a broader one-to-one deployment with minimal risk and investment by the school; and,
- confidence and capacity building of administrators, teachers, technical support staff and parents to commit to implementing a 1:1 iPad program.

We will support with:

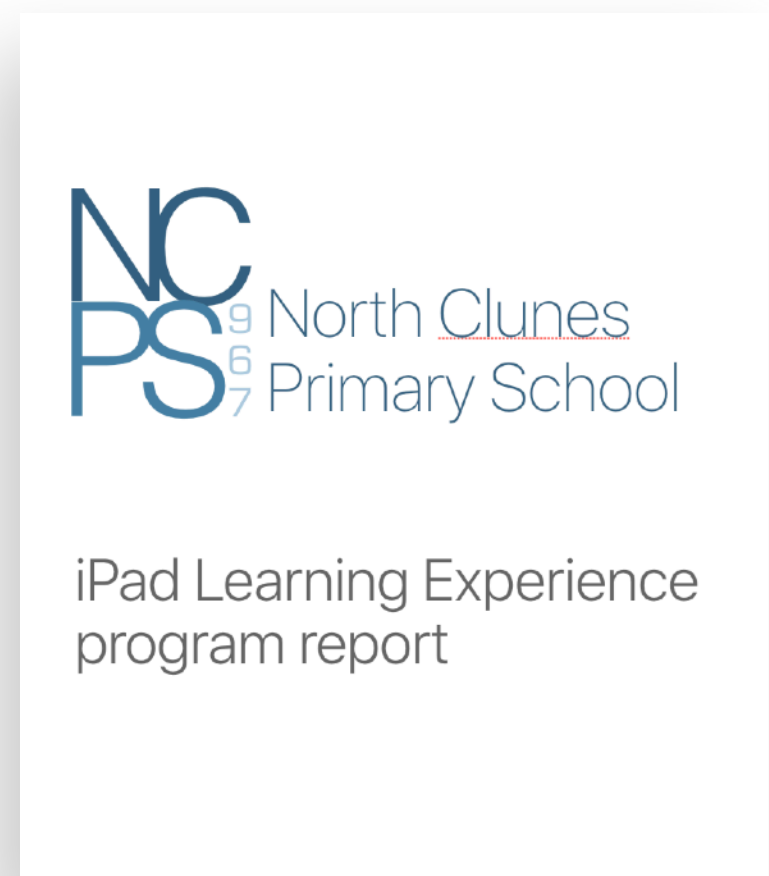

Technical guidance to
preconfigure student devices

+

Teaching and
technical support

+

Evidence of Success
Detailed Report

The iPad Learning Experience is about exposure to the Apple ecosystem, utilising data to generate conversation, and creating advocates for the effective use of technology.

The participating school will commit to:

- ☐ Participate in a pre-planning session to confirm expectations, curriculum focus and confirm any specific technical / setup requests for the ILE.
- ☐ Purchasing or reallocate iPads to ensure that every child and the teacher(s) have a suitable device.
- ☐ Commit to staff resourcing to facilitate the ILE, including .5 day of planning and support for staff to observe the iPad class in action.
- ☐ Provide any technical assistance related to school's network or infrastructure (as required).
- ☐ Commit all stakeholders to participate in a post-ILE debriefing session.

Program Flow

School commits to an ILE.

School receives information pack.

Construct curriculum plans with teachers and technical deployment with IT.

Communicate to parent community (4 weeks prior).

Apple Professional Learning Specialist co-facilitate ILE program.

Debrief with all stakeholders, identification of next steps.

Present evidence of success document.

Program Timeline
